

# Recording Short Tutorials Using a Smartboard

Roxane Millette

Biology Department

[roxane.millette@johnabbott.qc.ca](mailto:roxane.millette@johnabbott.qc.ca)

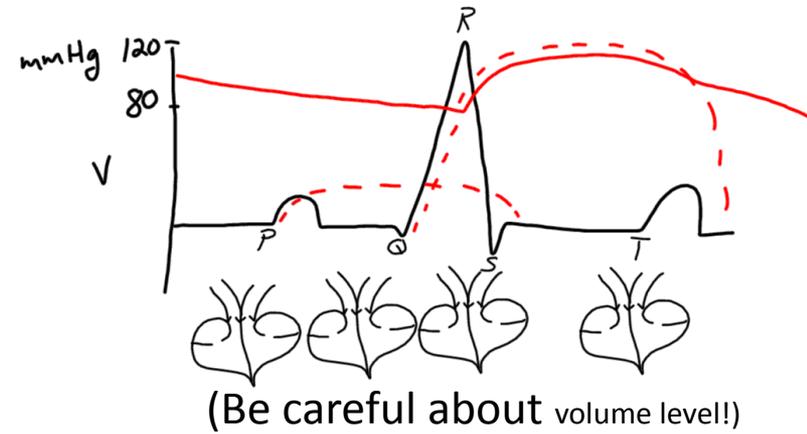

# Advantages

- Tailored to students  
compared to professional online tutorial.
- Easily accessible  
(constraints re time & location)
- Comfort  
(reduced anxiety, control of pace, repetition)

# Finished Products

## Drawing and Audio

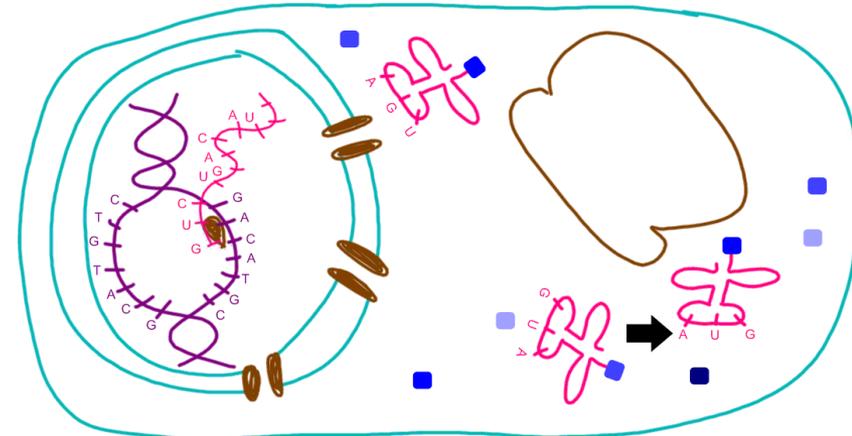

## Drawing on a presentation and Audio

component	definition verb + ...	organ
stimulus		
receptor	senses, perceives, monitors	
afferent conductor	conducts from R to C	
control center	integrates, decides, controls	
efferent conductor	conducts from C to E	
effector	carries out the response	
response	local	
	systemic	

(Be careful about volume level!)

## Drawing on a presentation of multiple slides and Audio

# How to:

1. Set up recording function
2. Optimize recording
3. Save recording

# Setting up the recording function

1. Open ***SMART Notebook*** software.

2. Click on ***options*** icon to customize the toolbar.

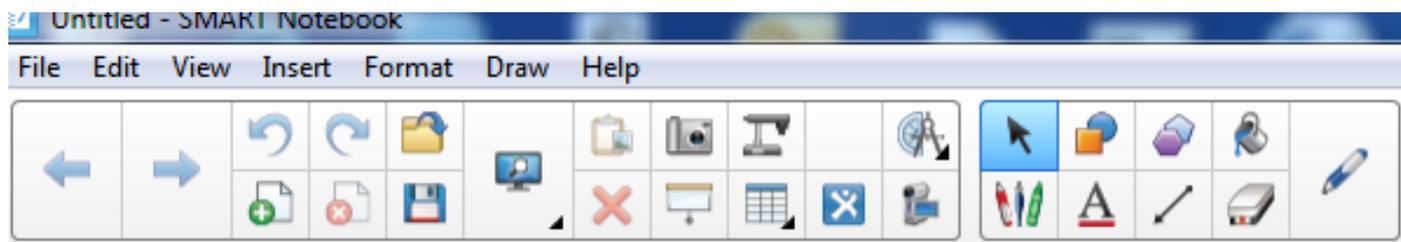

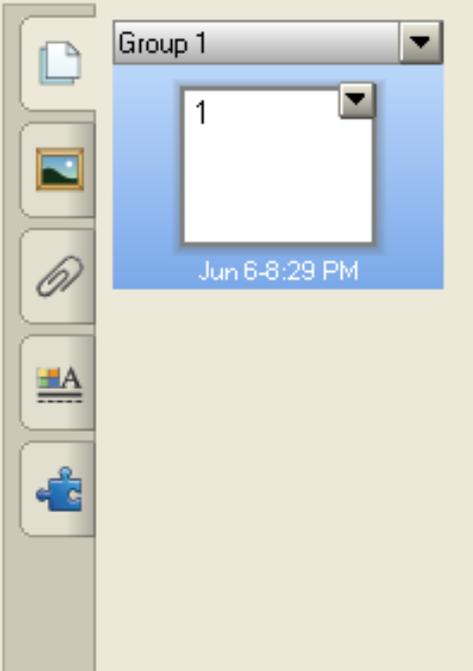

3. Select ***SMART recorder*** icon.

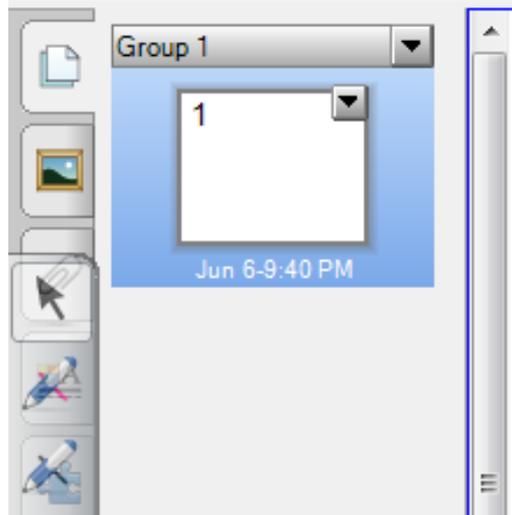

4. Drag icon to toolbar.

Recording icon can't be selected if not connected to Smart board

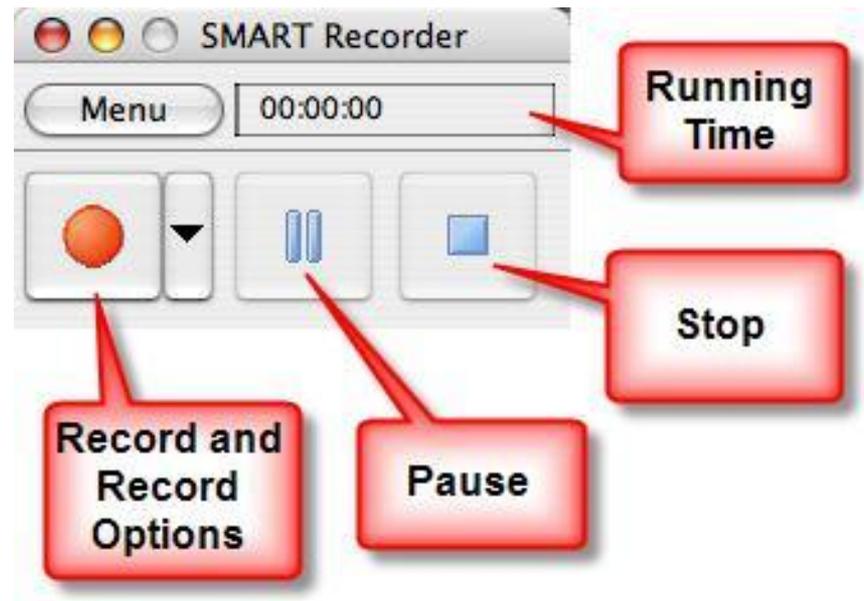

Recording icon can be selected when connected to Smart board

# How to:

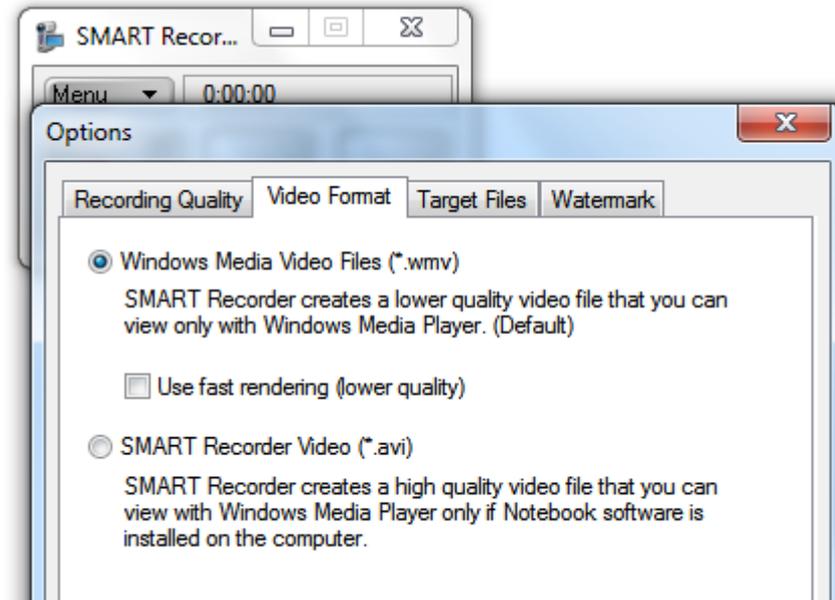

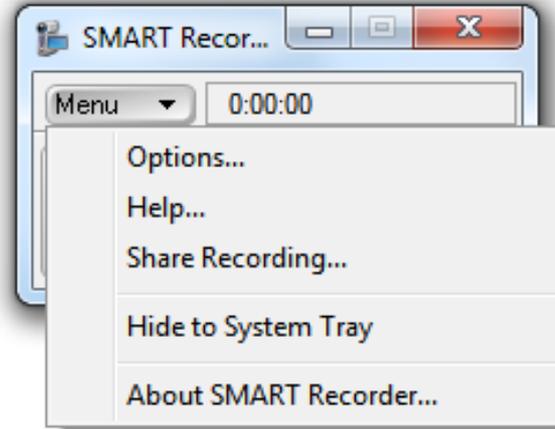

1. Set up recording function
2. Optimize recording
3. Save recording

1. Open new or existing SMART Notebook file.
2. Click on the recorder icon to open the recorder window.

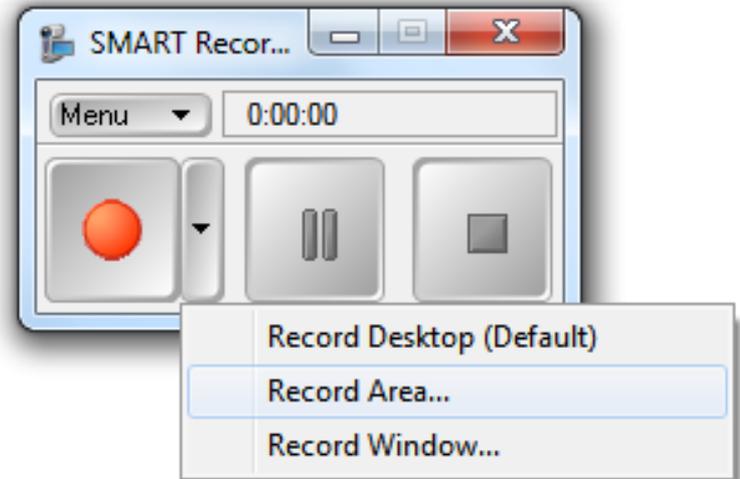

# Selecting in which format to save the recording.

1. Open the **menu** in the recorder window.
2. Open the **options** the menu window.
3. Open the **video format** in the options window.
4. Select **Windows Media Video Files (.wmv)** for students to be able to view the file on their computer.

# Optimizing Recording

1. Click on arrow beside record button for recording options.
2. Select ***record area*** from the menu.
3. Draw a rectangle around the area you would like to record. Recording begins.

Draw a rectangle around the area you would like to record. Recording begins.

The screenshot displays the SMART Notebook application window titled "Untitled \* - SMART Notebook". The interface includes a menu bar (File, Edit, View, Insert, Format, Draw, Help), a toolbar with various drawing and editing tools, and a left-hand sidebar with additional tools. A "Recording..." dialog box is open, showing a "Menu" dropdown, a timer at "0:00:03", and a frame rate of "8.0 fps". The dialog also features a play button, a pause button, and a stop button. In the main workspace, a red rectangle is drawn around the handwritten text "area which I would like to record." The Windows taskbar at the bottom shows the system clock as 12:09 AM on 6/7/2013.

# How to:

1. Set up recording function
2. Optimize recording
3. Save recording

Save the file (.wmv) in the folder destination of your choice.
