Hi Exemplem!

Thank you for signing up with Diigo, a next generation social bookmarking and annotation service where you can highlight, tag, add sticky notes and comment on any webpages. With emphasis on collaboration and the power of the community, Diigo greatly improves how people discover, remember, collaborate, and share on the Internet.

To activate your account, click the following link:

http://www.diigo.com/user_mana2/register_verify/9e83e1fa4d11f44a0558f98d0b0cd26d

If the link is not clickable, you can copy and paste it into your browser's address box.

Here is your Diigo login info:

Username: exemplemdrouin

email: exemplemdrouin@hotmail.com

After you activate your account, we'll lead you through the next steps of your registration. Then you'll be ready to begin Diigoing!

Welcome to the Diigo Community!

Hi exemplem drouin, your Diigo account has been activated. Welcome to the Diigo community!

My Library

This is the central place to store all your bookmarks, highlights, notes, pictures.
For now, you haven't saved anything yet.

Option 1 - You can get started by adding diigolet to your browser

Diigolet is a "super bookmarklet" that allows you to highlight and add sticky-notes, in addition to simple bookmarking.

1. Make sure the "Bookmarks Toolbar" is visible. If it is not, go to menu View > Toolbars.
2. Drag this button:  up to your Bookmarks Toolbar.

Classroom Collaboration Using Social Bookmarking Service Diigo

By Michael F. Ruffini

- **Social bookmarking websites** enhance and improve the learning experience by encouraging **group collaboration** and making **organizing and saving web resources** faster and easier for students.
- Social bookmarking services offer **greater scope** for **research, integration, and collaboration** compared to the more traditional bookmarking applications such as browsers, which offer limited functionality.
- Among social bookmarking services, **Diigo** has features and functions that make it **useful for the classroom**, giving instructors tools for setting up groups of students, highlighting key information, and commenting.

Classroom collaboration is an area that benefits directly from today's Internet experience in that students can develop their potential for learning by becoming more actively involved. Indeed, they can learn to approach and solve problems by collaborating with other students and their teachers. [Social bookmarking](#) websites give them opportunities to discover and organize information.

While many social bookmarking sites offer some collaboration opportunities, I have found that [Diigo](#) (Digest of Internet Information, Groups and Other stuff) combines a user-friendly social platform with bookmarking features, making it an effective research, integration, and collaboration tool for use in the classroom. In this article, I compare the benefits of traditional and social bookmarking websites. Then, using Diigo as a focus, I explore the possible uses and benefits of social bookmarking for research and collaboration in the classroom.

Traditional Bookmarking

Teachers and students routinely use the Internet for archiving, organizing, and sharing information associated with their research and in collaboration with others on projects. Keeping track of and organizing the incalculable website options available is a daunting task. Most commonly, users save a web page's URL with their personal browser's bookmarking feature, like [Favorites](#) (in Explorer) or [Bookmarks](#) (in Firefox), to revisit it in the future.

However, these browser bookmarking systems have not kept up with the changes and growth of the Internet, saving clusters of websites arranged loosely around informational themes. While this method of saving web pages and websites can help a computer user remember and quickly access important sites, there are numerous disadvantages:

collaboration with others on projects. Keeping track of and organizing the incalculable website options available commonly, users save a web page's URL with their personal browser's bookmarking feature, like Favorites (in Explorer) or Bookmarks (in Firefox), to revisit it in the future.

However, these browser bookmarking systems have not kept up with the changes and growth of the Internet, saving arranged loosely around informational themes. While this method of saving web pages and websites can help a computer user quickly access important sites, there are numerous disadvantages:

- Building a list of important bookmarks not only is time-consuming, but the list is only available on the individual user's computer.
- Large collections of bookmarks can quickly become unmanageable and disorganized.
- Users may not remember why they created a bookmark or what part of the page they were trying to save.¹

Social Bookmarking

The proliferation of Web 2.0 tools has inspired the development of a number of applications designed to enhance collaboration. Notable among these are social bookmarking systems. From a social network platform, they serve as an organization to organize a variety of web resources (hyperlinks, documents, podcasts, video files, graphics, etc.).² Social bookmarking differs from the traditional schemes, principally because it relies on a web-based system of classification known as folksonomy. Tags are created and managed to annotate and categorize web content.

Social bookmarking sites first appeared about 10 years ago, but did not gain wide popularity until the launch of Delicious in 2003. Today, the many sites available today, Delicious and Diigo are the two most commonly used in education.

One key difference between Delicious and Diigo is annotation. The latter allows users to highlight any part of a web page and attach sticky notes to specific highlights or to a whole page. These annotations can be kept private, shared with a Diigo group, or forwarded as a special link to other individuals or groups for collaborative purposes. Table 1 compares the main features of Diigo, Delicious, and traditional browsers.³

Table 1. Social Bookmarking Comparison Chart

Feature	Diigo	Delicious	Browser
Organize bookmarks automatically with tags	x	x	x
Popular bookmarks	X	X	X
Anytime, anywhere access to bookmarks	X	X	
Share bookmarks with others	X	X	
Powerful, customizable search tools	X	X

Online Tools for Language Teaching

June 2011 — Volume 15, Number 1

** On the Internet **

Jeong-Bae Son

jeong-bae.son@usq.edu.au

University of Southern Queensland, Australia

Introduction

There are a large number of online tools that can be used for second/foreign language learning and teaching (Chapelle & Jamieson, 2008; Garrett, 2009; Godwin-Jones, 2009, 2010; Levy, 2009; Meskill & Anthony, 2010; Warschauer, 2010). The increasing awareness of the tools generates a need for computer-assisted language learning (CALL) researchers and practitioners to develop and implement CALL widely by exploring, selecting, using and evaluating the tools in a variety of contexts. In this paper, I discuss the place and role of online language teaching tools in CALL and present a categorised list of the tools, which provides a basis for further research and practice in CALL.

Here are a few sites comparing and contrasting Diigo and Delicious.

[Send](#) [Cancel](#)

- ☐ [The Creative Lounge : Diigo and Del.icio.us](#)
- Description comparative des sites Delicious et Diigo en anglais.
- [more from www.creative.co.ke](#) - Not Cached - Edit - Remove - Preview
- [anglais](#) [English](#) [delicious](#) [dingo](#) [Social Bookmarking](#)

Del.icio.us: Known as the standard by which other social bookmarking sites are measured it has a strong community and a rich layer of content beyond that of other social bookmarking sites. Designed on the less-is-more philosophy, it has a rather plain but easy-to-use interface. Del.icio.us does not have the bells and whistles of some of the other social bookmarking sites, but being simple to use and having a strong community makes it one of the best choices for a new user.

Diigo: Diigo is an online bookmarking tool with a twist. Sometimes, merely saving a bunch of tagged Web sites to a list of favorites is not enough. Ever wanted to highlight one cool corner of a Web page? Do you wish you could scribble on various Web sites to collect recipes, plan a vacation, or write a big research paper, then share your notes? Diigo can help you do that.

You can import bookmarks en masse from Firefox, Internet Explorer, or Del.icio.us or add new bookmarks individually at the Diigo site. One of Diigo's advantages is that you can add new bookmarks and tags simultaneously to Del.icio.us, Yahoo My Web, and elsewhere.

Diigo, mode d'e...My LibraryContactez les Pr...Proxy: accès hor...Hotmail - exem...My LibraryDiigo/Delicious...groups.diigo.co...+Diigo/Delicious...Known as the standard by which other social bookmarking sites are measured it has a strong community and a non-layer of content beyond that of other social bookmarking sites. Designed on the less-is-more philosophy, it has a rather plain but easy-to-use interface. Del.icio.us does not have the bells and whistles of some of the other social bookmarking sites, but being simple to use and having a strong community makes it one of the best choices for a new user.

Diigo: Diigo is an online bookmarking tool with a twist. Sometimes, merely saving a bunch of tagged Web sites to a list of favorites is not enough. Ever wanted to highlight one cool corner of a Web page? Do you wish you could scribble on various Web sites to collect recipes, plan a vacation, or write a big research paper, then share your notes? Diigo can help you do that.

You can import bookmarks en masse from Firefox, Internet Explorer, or Del.icio.us or add new bookmarks individually at the Diigo site. One of Diigo's advantages is that you can add new bookmarks and tags simultaneously to Del.icio.us, Yahoo My Web, and elsewhere.

Diigo's plain text interface is as simple as that of Del.icio.us, yet with an added functionality. For instance, Diigo let's you select a bunch of bookmarks at once and change their settings: Del.icio.us does not. Unfortunately, Diigo can't preview saved pages within the same pane the way Windows Live Favorites does.

Searching is fast and easy with Google's web browser.

Then, using efits of social bookmarking for research and collaboration in the classroom.

Traditional Bookmarking

Teachers and students routinely use the Internet for archiving, organizing, and sharing information associated with their research and in collaboration with others on projects. Keeping track of and organizing the incalculable website options available is a daunting task. Most commonly, users save a web page's URL with their personal browser's bookmarking feature, like **Favorites** (in Explorer) or **Bookmarks** (in Firefox), to revisit it in the future.

However, these browser bookmarking systems have not kept up with the changes and growth of the Internet, saving clusters of websites arranged loosely around informational themes. While this method of saving web pages and websites can help a computer user remember and quickly access important sites, there are numerous disadvantages:

- Building a list of important bookmarks not only is time-consuming, but the list is only available on the individual user's computer.
- Large collections of bookmarks can quickly become unmanageable and disorganized.

on Using Social Bookmarking Service Diigo

an improve the learning experience by encouraging group collaboration and making
ist and easier for students.

scope for research, integration, and collaboration compared to the more traditional
bookmarking applications such as browsers, which offer limited functionality.

- Among social bookmarking services, **Diigo** has features and functions that make it **useful for the classroom**, giving instructors tools for setting up groups of students, highlighting key information, and commenting.

Classroom collaboration is an area that benefits directly from today's Internet experience in that students can develop their potential for learning by becoming more actively involved. Indeed, they can learn to approach and solve problems by collaborating with other students and their teachers. [Social bookmarking](#) websites give them opportunities to discover and organize information.

While many social bookmarking sites offer some collaboration opportunities, I have found that [Diigo](#) (Digest of Internet Information, Groups and Other stuff) combines a user-friendly social platform with bookmarking features, making it an effective research, integration, and collaboration tool for use in the classroom. In this article, I compare the benefits of traditional and social bookmarking websites. Then, using Diigo as a focus, I explore the possible uses and benefits of social bookmarking for research and collaboration in the classroom.

Traditional Bookmarking

Teachers and students routinely use the Internet for archiving, organizing, and sharing information associated with their research and in collaboration with others on projects. Keeping track of and organizing the incalculable website options available is a daunting task. Most commonly, users save a web page's URL with their personal browser's bookmarking feature, like [Favorites](#) (in Explorer) or [Bookmarks](#) (in Firefox), to revisit it in the future.

However, these browser bookmarking systems have not kept up with the changes and growth of the Internet, saving clusters of websites arranged loosely around informational themes. While this method of saving web pages and websites can help a computer user remember and quickly access important sites, there are numerous disadvantages:

- Building a list of important bookmarks not only is time-consuming, but the list is only available on the individual user's computer.
- Large collections of bookmarks can quickly become unmanageable and disorganized.
